System Request – Crab Side scroller Platformer

Project Sponsor: Huy Vo

Business Needs: This project has been initiated to help entertain people by making a simple platformer with a side scrolling mechanic until player fails.

Business Requirements:

- Endless level scrolling
- High Score Tracking capability
- Character jumping over gaps
- Menu for starting the game, restarting a run on failure, and leaderboard
- Can be played offline

Business Value:

We expect this platformer game will be of entertainment purposes to help motivate the users to relieve stress of their other tasks by making them have some form of fun during down times.

Special Issues / Constraints:

- Considering hardware availability, this should be able to be above 30 frames per second with most computing hardware.
- Contrast and indicator of a platform to the character must should be easily identified
- Offline accessibility and operation should be achieved by packaging it as an executable.
